Bitdefender®

GravityZone

GRAVITYZONE PORTFOLIO

Effortless Security. Unmatched Protection.

Eliminate complexity and reduce risk with security, optimized for your business, that consistently leads independent evaluations.

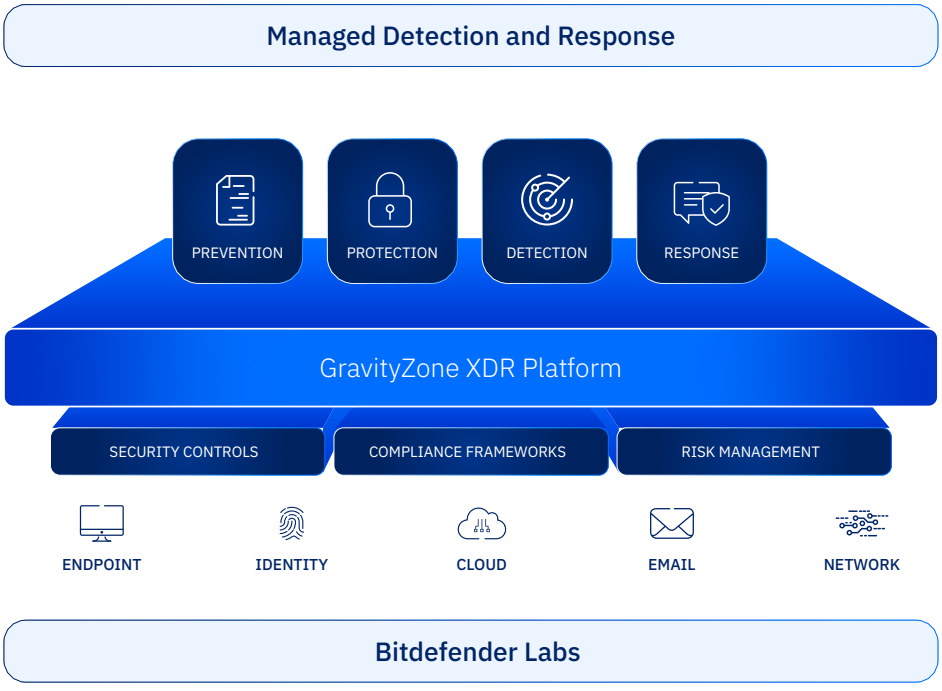
Why Bitdefender GravityZone:



- A consolidated platform that unifies prevention, protection, detection and response across endpoint, identities, cloud, network and email.
- Security tooling and services optimized for lean IT and security teams, with all the in-depth capabilities required by security and risk management practitioners.
- Underpinned by innovative security technologies that power the world's security eco-systems.

Invest confidently in security that grows with your business

GravityZone is an extensible platform that is architected to enable continuous deployment of innovative technologies and defend against new threats. This approach combines with flexible licensing to enable you to add the functionality you need as your security program matures over time.

GravityZone core platform add-on solutions and services

Upgrading **GravityZone** is easy: simply apply a new license key, reconfigure the Bitdefender Endpoint Security Tools agent to include the additional module(s), and update the policy. Customers can easily start and manage 30-day free trials for next-tier products and add-ons from the Product Trials Hub.

GravityZone Extended Detection and Response (XDR)

GravityZone Extended Detection and Response (XDR) automatically correlates and contextualizes threat signals across the enterprise to form a unified, human-readable attack picture that enables teams to quickly respond.

Why choose GravityZone XDR?

Attack visualization beyond endpoints, automated incident correlation and analysis

Unique human-readable incident synopsis and response recommendations

Native sensors turnkey deployment, no custom integrations and detections needed

Bitdefender Managed Detection and Response

Bitdefender Managed Detection and Response (MDR) augments IT organizations with 24x7 security monitoring, advanced attack prevention, detection and remediation, plus targeted and risk-based threat hunting by a certified team of security experts.

Why choose Bitdefender MDR?

Extend in-house capabilities with 24x7 security operations staffed by experts

Defeat attacks through pre-approved actions executed by SOC analysts

Leverage highly skilled analysts, former U.S. Air Force & Navy, British Intelligence, and NSA

GravityZone Security Data Lake

GravityZone Security Data Lake is a modern solution that redefines SIEM by unifying security operations, scalable storage, and analytics in one cloud solution. It empowers organizations and MSPs with full visibility, faster response, streamlined compliance, lower costs, and deeper MDR investigations using third-party telemetry data. Why choose GravityZone Security Data Lake:

Why choose GravityZone Security Data Lake?

Collect, normalize, and correlate logs from endpoints, networks, cloud, and more in one platform

Asset risk scoring automatically surfaces the most critical risks, cutting noise and investigation time

Built-in archiving, tiered retention options, and instant recall support regulations like GDPR, SOC 2, PCI DSS, NIS2, and DORA

GravityZone PHASR

A staggering 84% of major attacks today involve native tool abuse by attackers who blend in with legitimate user activity to escape detection. **GravityZone PHASR** is a groundbreaking solution that shrinks the attack surface, tailoring security to each users' behavior and restricting unnecessary but risky tools without impact on productivity.

Why choose GravityZone PHASR?

Uncover unused risky tools, restrict access to them and shrink the attack surface

Stop the stealthy Living off the Land techniques without slowdowns and IT overhead

Easily achieve and demonstrate significant risk reduction to leadership

GravityZone Compliance Manager

GravityZone Compliance Manager simplifies compliance by providing real-time visibility into your security and compliance posture – all within the unified GravityZone platform. It reduces manual work and reliance on specialized expertise, helping organizations meet regulatory requirements, minimize risk, and strengthen cyber resilience.

Why choose GravityZone Compliance Manager?

Save time and reduce overhead with automated compliance mapping

Stay ahead of evolving regulations such as GDPR, SOC 2, PCI DSS, NIS2, and DORA

Streamline audits with on-demand technical evidence and audit-ready reports

GravityZone Patch Management

Unpatched vulnerable operating systems or third-party applications are involved in up to a third of breaches. **GravityZone Patch Management** is a leading solution that accelerates patch scans and enables automatic and manual deployment of security and non-security patches.

Why choose GravityZone Patch Management?

Fastest solution to scan and deploy patches

Support for the largest set of third-party applications across Windows, Linux, and macOS

Centralize patching across sites, physical and virtual workstations, and servers

GravityZone External Attack Surface Management (EASM)

Attackers move fast, scanning the internet just minutes after new vulnerabilities are public. **GravityZone EASM** continuously discovers internet-facing assets, including shadow IT, misconfigured and vulnerable services, expired certificates, and similar domains, enabling teams to prioritize external vulnerabilities and mitigate exposures before attackers strike.

Why choose GravityZone EASM?

Continuously discover all internet-facing assets and proactively close security gaps

Improve exposure management by prioritizing remediation of high-severity vulnerabilities impacting internet-facing assets.

Consolidate cyber risk and exposure management to a single comprehensive platform

GravityZone Full Disk Encryption

GravityZone Full Disk Encryption reduces the risk of confidential data being exposed when devices are lost or stolen. It makes it easy to remotely encrypt systems, manage key recovery, and demonstrate compliance with regulations like GDPR, HIPAA, PCI DSS and more.

Why choose GravityZone Full Disk Encryption?

Avoid performance issues, use native encryption: Windows (BitLocker) and Mac (FileVault)

Simplifies encryption and key management as well as compliance reporting

Very easy to deploy and manage from GravityZone using a single endpoint agent

GravityZone Extended Email Security

GravityZone Extended Email Security delivers dual-layer protection with both Secure Email Gateway (SEG) filtering and API-based mailbox security. This cloud-native, API-enabled solution stops threats before they reach users and continuously monitors post-delivery to detect and remediate advanced attacks.

Why choose GravityZone Extended Email Security?

Pre- and post-delivery protection for end-to-end email security

Stops ransomware, phishing, impersonation, and business email compromise

Intuitive, fast UI with centralized multi-tenant management for MSPs and businesses

GravityZone Security for Mobile

GravityZone Security for Mobile ensures secure access to corporate data, protecting both corporate-owned and BYOD devices from modern attack vectors, including zero-day, phishing, and network attacks, by detecting known and unknown threats.

Why choose GravityZone Security for Mobile?

Device and platform agnostic Mobile Threat Defense for iOS, Android, and ChromeOS

Broad capabilities: application protection & vetting, web, device and network protection

End-to-end attack visibility, MITRE tagging, extended detection and response

GravityZone Security for Containers

GravityZone Security for Containers protects container workloads against modern Linux and container attacks using AI threat prevention, Linux-specific anti-exploit technologies, and context-aware endpoint detection and response (EDR).

Why GravityZone Security for Containers?

Context-aware security protects against and detects container-specific attacks

Consolidated workload, container runtime security across multi, hybrid-cloud

Kernel-agnostic security eliminates Linux security compatibility challenges

GravityZone CSPM+

GravityZone CSPM+ (Cloud Security Posture Management) delivers visibility into your cloud footprint and automatically identifies configurations which are outside of compliance frameworks and best practices.

Why choose CSPM+?

Inventory cloud assets and prioritize misconfigurations to lower risk

Eliminate manual efforts, quickly surface problematic configurations for compliance

Detect threats and leverage actionable, human-readable outcomes

Bitdefender is a cybersecurity leader delivering best-in-class threat prevention, detection, and response solutions worldwide. Guardian over millions of consumer, enterprise, and government environments, Bitdefender is one of the industry's most trusted experts for eliminating threats, protecting privacy, digital identity and data, and enabling cyber resilience. With deep investments in research and development, Bitdefender Labs discovers hundreds of new threats each minute and validates billions of threat queries daily. The company has pioneered breakthrough innovations in antimalware, IoT security, behavioral analytics, and artificial intelligence and its technology is licensed by more than 200 of the world's most recognized technology brands. Founded in 2001, Bitdefender has customers in 170+ countries with offices around the world.
